

Project Title: Industry Specific Intelligent Fire Management system

Project Design Phase-I - Solution Fit Template

Team ID:PNT2022TMID29717

Define CS, fit into C	<div>CS</div> <div>1.CUSTOMER SEGMENT(S)</div> <div>According to our problem statement ,employees ,machine in industry and surroundings</div>	<div>CC</div> <div>6. CUSTOMER CONSTRAINTS</div> <div>Problems smolder until they flare up, often just before a deadline. Then they require heroic efforts to solve. So many problems are solved inadequately and so many opportunities forgone that overall performance plummets</div>	<div>AS</div> <div>7.AVAILABLE SOLUTION</div> <div>The task of a fire-fighting system is to early detect and minimise the consequences of a fire, and thus protect people and property. Simple fire-fighting systems consist of a fire and smoke detector, a control panel and fixed fire-fighting systems,</div>	Explore AS, diff fer
	<div>J&D</div> <div>2. JOBS-TO-BE-DONE / PROBLEMS.</div> <div>Firefighters serve the public. They keep people and property safe from fire. Firefighters respond to medical calls as well as fire calls. They help people about ways to prevent fires.</div>	<div>RC</div> <div>9. PROBLEM ROOT CAUSE</div> <div>This fire alert system worked exactly like it was supposed to work. A fire alarm was activated and a guard was sent to check it out.</div>	<div>BE</div> <div>7. BEHAVIOUR</div> <div>Fire safety relates to fire prevention, minimizing the spread of fire and smoke, extinguishing a fire, and the possibility of a swift and safe evacuation. Aside from that, fire safety regulations reflect how people think about this subject in society at large as well as in politics</div>	

Start	<div>TR</div> <div>3. TRIGGERS</div> <div>Fire remains as dominant hazard and one of the major causes of lives and property loss in workplace. Leading causes of fire breakout could be negligence or lack of fire safety awareness or carelessness.</div>	<div>SL</div> <div>10. YOUR SOLUTION</div> <div>Fire Solutions is a full service design, installation, renovation, repair, inspection and consulting of fire and life safety systems. We strive to provide our clients with the best systems and services to meet there needs, budgets, and timeline.</div>	<div>CH</div> <div>8.CHANNELS of BEHAVIOUR</div> <div>We have suffered numerous fire accidents so far, we hear news of disasters such as fires, explosions and collapses every morning, all over the world. So we have to reduce fire based techniques .</div>	strong

4. EMOTIONS: BEFORE / AFTER

EM

Get more fear when the fire happens, after the fire reduced the fear has been reduced.
