Create a code snippet using python to

The screenshot shows a Google Chrome browser window with the OpenWeather website. The address bar shows 'home.openweathermap.org'. A green confirmation message at the top states: 'We have sent the confirmation link to nsp789052@gmail.com. Please check your email.' Below this, a navigation bar includes links like 'New Products', 'Services', 'API keys', 'Billing plans', 'Payments', 'Block logs', 'My orders', 'My profile', and 'Ask a question'. The main content area features a section titled 'Historical weather for any location' with a sub-header 'Historical weather for any location'. It describes a new technology called 'Time Machine' that enhances historical weather data. Key points listed are: 'Historical weather data available for ANY coordinate' and 'The depth of historical data have been extended to 40 YEARS'. Below this, it says 'You can download data from Personal account or contact us to order it.' There are two orange buttons: 'Learn more' and 'Go to purchase'. At the bottom, there is a 'Weather Dashboard' section with a colorful weather icon.
